Abstract

Curtis Jr (2018) restates theories Individual Leisure Theory, with Price-Adjustments, for Individuals in Capital Markets, and Individual Returns to Accumulation vs. Latent Systems, with considerations of Expected Returns, Information & Market Clearing and how Graduate Program degree candidates and universities can increase higher education market efficiency with effective form administration through enhancing i. admissions administration, ii. degree administration, iii. employment administration, and iv. publishing administration.

Keywords: applied economics education, financial economics, human capital theory

1. Introduction

Curtis Jr (2018) applies administration and graduate program degree candidates to a market clearing condition, using economic and finance theory from Curtis Jr (2017) to show the decision-making processes of an individual dividing time between higher education knowledge and wisdom accumulation and leisure. James Curtis Jr also shows university officials and executives the decision-making processes of individuals dividing their time between leisure, and financial endowment management and growth.

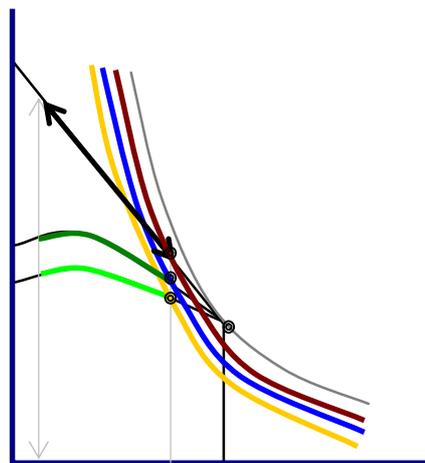

Figure 1. Individual leisure theory, with price-adjustments, for individuals in capital markets, created by James E Curtis Jr

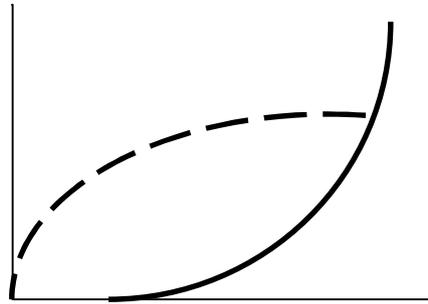

Figure 2. Individual returns to accumulation vs. latent systems, with considerations of expected returns, information & market clearing, created by James E Curtis Jr

These concepts applied to the processes of higher education and effective university administration, theoretically, leading to more productive graduates from a Graduate Program.

Excerpts from Education Foundation, "History of Education and History of The PhD", Education Foundation Preliminary Paper Series, with sincere gratitude to EF PRA James E Curtis, Jr & Wikipedia.org. Historically, "...advanced degrees were not a criterion for professorships at most colleges. That began to change as the more ambitious scholars at major schools (began to immigrate from) the U.S." in the mid-1900s. Furthermore, "that of the institutions awarding termed Ph.D.s in 1936 were undergraduate institutions that granted the degree for work done away from campus. ... Degrees awarded by universities without (association and/or U.S. Department of Education certified) Ph.D. programs accounted for about a third of the 302 doctorates recorded by the U.S. Department of Education in 1936." Among these doctorate degrees, "9-10% were honorary" J.E. H.Ph.D.

Comparatively, "philosophy" (of Doctor of Philosophy) does not refer to the (study) of philosophy, but is used in a broader sense in accordance with its original Greek meaning, "...true of wisdom" in most of Europe, all fields: history, philosophy, social sciences, mathematics, and ... natural sciences, other than the so-called ... vocational ... curriculum ... were traditionally known as philosophy"

Historically, "the requirements to earn a Ph.D. degree vary considerably according to the country, institution, and time period, from entry-level research degrees to higher doctorates." U.S. students typically undergo a series of three phases in the course of their work toward the Ph.D. degree', 1. coursework, 2. examinations and "high level" teaching, & 3. written dissertation.

 4320 Curtis, J. (2015) compares paper archive methods. The Education Foundation Preliminary Paper Series is an electronic
 4321 research library. "An e-library [includes] an online collection of e-books. It is often an extension to a normal library and
 4322 can be accessed with your library account. Often, the books available as paperback in a library may also be available
 4323 as e-books." (<http://www.quora.com/What-is-concept-of-e-library/>). SOAS describes an e-library as "An electronic journal
 4324 is a periodical publication which is published in electronic format, usually on the internet. Electronic journals
 4325 have several advantages over traditional printed journals: You can search the contents pages and/or the full text of journals
 4326 to find articles on a certain subject." (SOAS, University of London, <https://www.soa.ac.uk/eLibrary/resources/journals/about/>).
 4327 The Cambridge Dictionary describes e-libraries as a "website that makes books and other reading material available to users"
 4328 (Cambridge English Dictionary, <https://dictionary.cambridge.org/us/dictionary/english/e-library/>). Collins Dictionary suggests
 4329 an "e-library ... [is] an electronic or online library where one can have access to books, journals, novels, articles,
 4330 or any other information over net ... [Other general reader or a research scholar may have access to a number of e-libraries
 4331 sitting at home level." (<http://www.collinsdictionary.com/us/thesaurus/56446/e-library/>). Finally, Proquest states an e-library
 4332 helps simplify the research process and empowers novice researchers to more easily and efficiently choose their research topic
 4333 and find authoritative information to support their research claim. It delivers one of the largest collections of periodical and digital
 4334 media content editorially selected." (www.proquest.com/products-services/e-library.html).

4320 Curtis, J. (2018) compares paper archive methods. The Education Foundation Preliminary Paper Series is an electronic research library. "An e-library (includes) an online collection of e-books. It is often an extension to a normal library and can be accessed with your library account. Often, the books available as paperbacks in a library may also be available as e-books." (<https://www.quora.com/What-is-concept-of-e-library>). SCAS describes an e-library as "An electronic journal is a periodical publication which is published in electronic format, usually on the Internet. Electronic journals have several advantages over traditional printed journals: You can search the contents pages and/or the full text of journals to find articles on a certain subject." (SCAS, University of London, <https://www.sas.ac.uk/library/resources/ejournals/about/>) The Cambridge Dictionary describes e-libraries as a "website that makes books and other reading material available to users" (Cambridge English Dictionary, <https://dictionary.cambridge.org/dictionary/english/e-library>). Collins Dictionary suggests an "e-library ... (is) an electronic or online library where one can have access to books, journals, novels, articles, or any other information over net. ... [the] general reader or a research scholar may have access to a number of e-libraries sitting at home level" (<https://www.collinsdictionary.com/dictionary/644/e-library>). Finally, Proquest states an e-library "helps simplify the research process and empowers novice researchers to more easily and efficiently choose their research topic and find authoritative information to support their research claim. It delivers one of the largest collections of periodical and digital media content editorially selected." (www.proquest.com/products-services/library.html)
